Micron Business Network Enablement FAQ

What is the SAP Business Network?

- Micron is advancing efforts to **streamline** our **procurement** and **accounts payable** relationship with our suppliers by leveraging the SAP Business Network for **electronic transactions**
- Moving forward, **all suppliers will be required to transact** through Micron's **Business Network** to receive payment

Why Network Enablement?

- **Increase invoice accuracy and timely payments** by enabling electronic transactions and transitioning suppliers currently using quick-enabled accounts to **Enterprise or Standard SAP Business Network accounts**
- Suppliers submit invoices electronically **without additional manual support from Micron**

How is Enablement Happening?

- Identify Suppliers in Scope by Invoice Volume
- Enable Suppliers through Phased Approach (Waves 1-5)
- Transact Electronically with Suppliers with greater Invoice Accuracy
- Realize benefits for both Micron and Suppliers i.e. streamlined processes & faster payments

Business Network Enablement Shared Benefits

- Streamlined processes
- Faster payments
- Better visibility to transactions
- Real-time PO delivery
- Online catalogs
- Invoice automation
- New Business Opportunities
