Micron's community investments in Idaho

On Oct. 27, 2026, Micron announced over $67 million in new Idaho community investments for transportation, housing and children.

These commitments build on the approximately $75 million Micron has contributed to Idaho communities since 2023 through more than 100 grants, investments and partnerships spanning roadway improvements, workforce development, education, STEM and AI programs, housing, childcare and community engagement. Micron's commitments also include internships, apprenticeships, volunteerism and industry-leading training programs that support students, workers and families while helping build an advanced semiconductor manufacturing ecosystem in the state.

Workforce development

- Micron has invested more than $17.5 million for workforce programs spanning education, technical training, internships, apprenticeships and other pathways into semiconductor careers. Initiatives with the College of Western Idaho, Boise State University and the University of Idaho are designed to strengthen the local semiconductor workforce.
- The company's more than 60,000-square-foot Micron Training Center further strengthens Idaho's workforce pipeline, with nearly 2,000 people expected to receive job-required training at the center over its first two years as they join Micron's workforce.
- From 2024 through 2026, Micron's Boise site hosted nearly 1,000 interns, while its Registered Apprenticeship Program has scaled nearly fivefold since launching in 2023, demonstrating significant growth in Micron's skilled-talent pipeline in Idaho.

Transportation

- Micron has already helped advance $25.1 million in transportation investments around our campus, including improvements to the North Campus Roadway, the South Pond Parking Lot, the Federal Way and Silicon Lane intersection, Gate A signalization, the Gigabit/ Appleton Roundabout, and roads along the Eisenman interchange, along with related transportation studies and analyses.

Childcare infrastructure

- Micron invested over $30 million in the Micron Early Learning Center, which opened in September 2024 with a capacity to support over 120 children up to 5 years old. The center adds important childcare capacity to the region and reduces pressure on other facilities. With the center at over 70% capacity, Micron continues to promote enrollment to team members and contractors. The Micron Early Learning Center is operated by Treasure Valley Family YMCA. Its curriculum, Frog Street, is STEM focused.
- The Early Childhood Development Registered Apprentice program started in fall 2025 and currently has 28 individuals enrolled. Through this program, apprentices will work at the Micron Early Learning Center to provide first-hand experience and apply learnings from the childhood development program.

Everyday engagement

- Since 2023, Micron has provided approximately $2 million for grants and local events, including Treasure Valley Family YMCA; Discovery Center of Idaho, Idaho Food Bank, Saint Alphonsus, St. Luke's, Idaho Community Foundation, Idaho Shakespeare Festival and the Boys & Girls Clubs.
- Micron employees contributed nearly 29,000 volunteer hours in Idaho over the past year and more than $4.2 million in giving and company matches to Idaho partners.

About Micron Technology, Inc.

Micron Technology, Inc., is a global leader in semiconductor memory and storage, powering AI and compute-intensive applications from cloud to edge. With a relentless focus on our customers, technology and product leadership, and manufacturing and operational excellence, Micron's comprehensive portfolio of high-performance DRAM, NAND and NOR solutions delivers the speed, efficiency and scale today's workloads demand, accelerating intelligence to enrich life for all.
