9300 PCIe NVMe SSD

Firmware Change List

MTFDHAL3T2TDR, MTFDHAL3T8TDP, MTFDHAL6T4TDR, MTFDHAL7T6TDP, MTFDHAL12T8TDR, MTFDHAL15T3TDP

_____

Purpose and Scope
This document describes changes applying to Specific Micron 9300 family production drives for the firmware versions referenced below. Questions relating to this change list should be directed to Micron technical support.

Firmware Version
Production Release: 11300DY0

Summary of Firmware Changes
Changes and improvements made in firmware 11300DY0 over previous firmware 11300DU0 are:
- UEFI HII OPROM feature improvement
- PCIe Link Retrain improvement
- General stability and reliability improvements

Note
Firmware Upgrade is highly recommended especially Intel PCIe Gen4 platform related to above feature/functionality.
