

Numbers and Operations: Assistant Produce Manager

Albertsons, Inc.

Job Description: Oversee the daily operation of the produce department for Albertsons grocery store.

Problem:

Find the percent of gross profit on sales of \$100,000. The cost of the goods sold is \$75,000.

Numbers and Operations: Assistant Produce Manager

Albertsons, Inc.

Job Description: Oversee the daily operation of the produce department for Albertsons grocery store.

Problem:

Find the percent of gross profit on sales of \$100,000. The cost of the goods sold is \$75,000.

Solution:

Subtract the cost of the goods sold from the sales and divide the sum by the sales.

Sales	100,000
Cost	<u>- 75,000</u>
	25,000

$$25,000 \div 100,000 = .25$$

Your percent of gross profit would be 25% on the items you sold.
