

Industrial microSD Cards for Surveillance Edge Storage

Growing Edge Storage in Video Surveillance Applications Requires Industrial-Quality Memory

Edge storage technology — the recording of video and storing it in the camera instead of in a centralized recording facility across the network — is quickly gaining acceptance and is being more broadly adopted into IP video surveillance applications.

Selecting a microSD card specifically designed for IP video surveillance cameras can bring more value and enhance system performance by providing recording redundancy, optimizing network load reduction and lowering overall TCO.

Why Micron Industrial microSD Cards for Edge Storage Applications

- 1. High Endurance**
Support for 3 years of high-quality, continuous 24/7 video recording.
- 2. Outstanding Recording Performance**
Optimized firmware provides stable performance for 24x7 high-quality video recording with minimal frame drops.
- 3. Industrial Quality**
Reliable, high quality with 2 million hours mean time to failure (MTTF) or an annualized failure rate of 0.44%; 2X the reliability of surveillance HDDs used in NVRs today.
- 4. Smart Tool for Health Monitoring**
Health monitoring feature for IP camera integration reports card usage and lifetime remaining and can be integrated into system software to alert end users.

Micron Industrial microSD Cards

microSD Cards Parts Table

Family	Part	Density	Shipping Method	Performance	Endurance	Operating Temperature
Industrial microSD Card	LSDMI32GBJWW	32GB	JC* Tray	Class 10	24/7; 3 years**	-25°C to 85°C
	LSDMI32G-000-747					
	LSDMI64GBJWW	64GB	JC* Tray			
	LSDMI64G-000-747					

* JC = Individual card in "jewel case"

**Based on specific bit rate for each capacity (see data sheet for more details)
